The Library of the Mississippi State Board of Health was established in 1936. Its primary purposes are to provide current information regarding scientific advances and to encourage broader investigation and learning in the respective medical fields.

Books and journals may be borrowed by licensed physicians, dentists, health workers, nurses and others engaged in health work. Most items are lent for two-week periods. Extension of loan will be granted upon request, unless the material is needed by others. Borrowers are expected to pay the cost of replacement of any book or periodical which may be lost or damaged while on loan.

The Librarian will gladly assist in the selection of references on any subject desired.

It is desired that application for loan of books and other medical library services be made through the local department.

NOTE: The foregoing is only a **partial** list of the books in the Mississippi State Board of Health Library. Should you not find listed a needed book, communicate with the Library anyway, and if your wants cannot be located on the shelves, an effort will be made to obtain needed items through inter-library loan.

Make the most of the opportunities the Library affords. Keep abreast of the rapid developments in the various sciences. In this way you will be able to contribute more to the control and eradication of disease.
